Subject: Notes on verification sampling for 825/835 Industrial Rd
Start: 8/20/2018 1:30:00 PM
End: 8/20/2018 2:00:00 PM
Show Time As: Busy

Verification:

- Already bounded contamination (x+y). If we have these boundaries that we are confident with.
- If ND or below threshold, within boundaries, could be used.
- Beyond site boundaries.
- Not convinced by data set. Also, there is no off-site data; data set limited to onsite.
- Negotiate – confirmation sampling to go forward, provide us with enough data to....in the absence of this, unwilling to approve in-situ this would be more for characterization.
- With respect to boundary. If you really want to do in way you are proposing, we can, given we are convinced that boundaries of contamination both laterally and vertically have been thoroughly defined.
- Submit RAW Addendum and include section on PCBs.

Approval for Wilmington:

- Redevelopment
